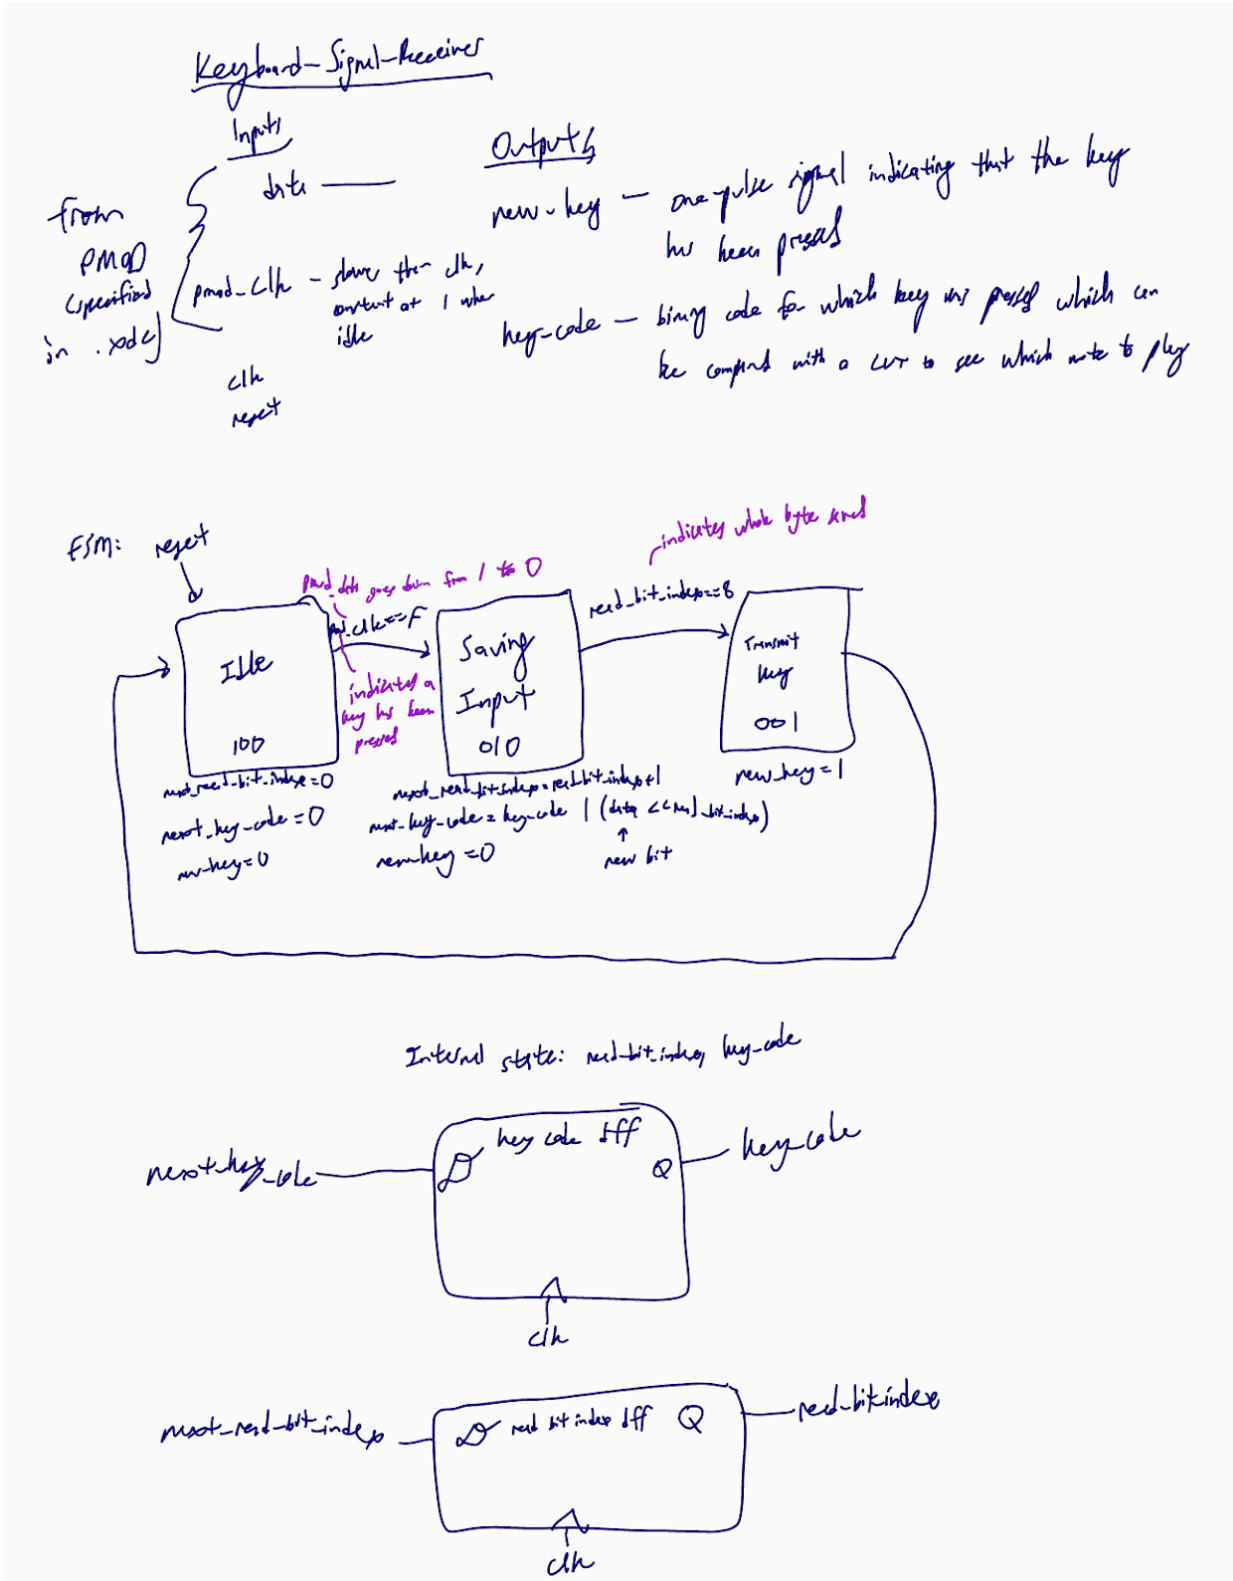
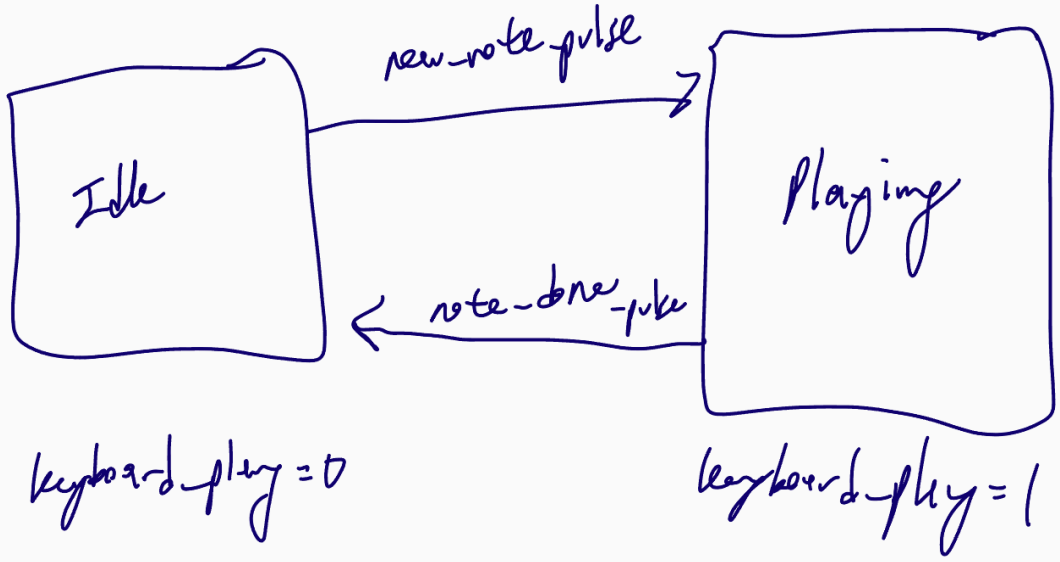
Keyboard Block Diagrams



keyboard_Reader



3/14/26 3:50pm: adding feature to ensure that state does not get stuck in SAVING_INPUT_STATE. This is to prevent the example tagged #(3.14.26 at 3:52pm) where it is stuck on SAVING_INPUT_STATE.

If cycles_since_read_bit_index_changed > # cycles for 3 PS/2 clock cycles

CYCLE_TIMEOUT

Then, just reset state to idle.

read_bit_index != next_read_bit_index // a change is happening

? 0

: cycles_since_... +1
